DETAILED ACTION

Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 41-62, drawn to a method of automatically cutting out and unloading stacks of pieces, classified in class 83, subclass 13.
 - II. Claims 63-80, drawn to an installation for automatically cutting out and unloading stacks of pieces, classified in class 83, subclass 78.
- 2. The inventions are distinct, each from the other because I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case (1) applies because the process as claimed can be practiced by another and materially different apparatus such as an installation with a robotic arm for moving a lay-up over the cutting table. This apparatus does not require a conveyor.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Election of Species

- 4. Upon electing either Group I or Group II above, further election is required of claims directed to the following patentably distinct species regarding the unloading tool:
 - A. FIG 3;

Page 2

Art Unit: 3724

- B. FIGS 9 and 10;
- C. FIG 11;
- D. FIG 12;
- E. FIG 13; and
- F. FIG 14.
- 5. After electing one of Groups A-F above, a further election is required of claims directed to the following patentably distinct species regarding the unloading station:
 - G. FIG 2;
 - H. FIGS 15 and 16;
 - I. FIG 17;
 - J. FIG 18;
 - K. FIG 19;
 - L. FIG 20;
 - M. FIG 21; and
 - N. FIG 22.
- 6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (one unloading tool and one unloading station) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.
- 7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3724

is allowable or that all claims are generic is considered nonresponsive unless

accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration

of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the

elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

10. Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

11. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Carolyn T Blake whose telephone number is (571) 272-

4503. The examiner can normally be reached on Monday to Friday, 8:00 AM to 5:30

PM, alternating Fridays off.
